Abstract of the Disclosure

The present invention is based on quad-fluoropolymer suitable for the preparation of a fluoroelastomer. The fluoropolymer comprises repeating units derived from 10 to 40 mol% of tetrafluoroethylene, 40 to 65 mol% of vinylidene fluoride, 1 to 30 mol% of a perfluorinated vinyl ether of the formula CF₂=CFOCF₂CF₂CF₂OCF₃, 1 to 20 mol% of perfluoromethyl vinylether.
